Education

Bachelor of Engineering, Computer Engineering

Toronto Metropolitan University (Ryerson University)

Toronto, ON

Graduation Date: Apr 2027

Projects

CedarKey AI | NestJS, tRPC, Prisma, pgvector, AWS S3, Stripe Webhooks, Google Gemini, GCP, Railway, Vercel, BullMQ, Jest Jul 2026

- Architected and shipped a SaaS platform for AI-generated contracts using **Next.js** and **NestJS**, onboarding **2 beta testers** who successfully processed **50 contracts** according to specifications.
- Built a **RAG** compliance engine achieving **100% retrieval accuracy** and a **6-second** response time, plus a **Puppeteer** e-signature pipeline generating signed PDFs in **under 8 seconds**.
- Implemented a comprehensive **Jest** automated testing suite across the Turborepo monorepo, engineering **52 unit and integration tests** across the API (28), frontend (14), and database (10) packages to ensure complete pipeline reliability.

Live ASL Translator | PyTorch, OpenCV, Google Mediapipe, Neural Networks, Computer Vision

June 2025

- Built a real-time **computer vision system** recognizing **24 ASL letters** with a custom **CNN**, reaching **99.2% held-out test accuracy** (n=11,172) and sub-**1ms** inference latency.
- Reduced prediction flicker by **87%** with a temporal smoothing algorithm on **Google Mediapipe** hand tracking, then segmented the letter stream into sentences using a custom **LSTM** model.

Home Linux Server API | Ubuntu Linux, Docker Compose, Nginx, Cloudflare, GitHub Actions, Golang, WebSockets

April 2026

- Deployed a self-hosted **Ubuntu Linux** production server with **Docker Compose**, an **Nginx** reverse proxy, and **Cloudflare tunnels**, maintaining **100% uptime** over the past 2 months.
- Developed a real-time **server monitoring API** in **Golang** using **WebSockets** with sub-**4ms** latency. Load tested with **k6**, sustaining **200 concurrent connections** at **100%** success and **95ms** average connection time.

Awards and Certifications

Getting Started with Deep Learning

December 2025

NVIDIA Deep Learning Institute

- Built and trained small scale image-based neural networks through a ground-up deep learning curriculum covering core training and refinement techniques.

OpenCV Bootcamp

Oct 2025

OpenCV University

- Developed intermediate level proficiency with the **OpenCV** computer vision library.
- Covered core topics including digital image processing, object tracking, and post processing.

Skills

Languages: Python, JavaScript, TypeScript, Java, C/C++, HTML/CSS, SQL, Golang

Frameworks & Libraries: React, Next.js, NestJS, Django, PyTorch, OpenCV, NumPy, Tailwind, tRPC, Prisma, scikit-learn, torchvision, Google Mediapipe, Puppeteer, BullMQ, Jest

Tools, Platforms & Cloud: Git, Docker, Docker Compose, Cloudflare, Linux, Nginx, AWS, PostgreSQL, pgvector, Redis, GitHub Actions, Vercel, Railway, k6
